# Welcome

Thank you for your interest in the Texas Laser Institute! We invite you to explore our 2020 brochure, discovering our current academic curriculum and professional courses of study. We hope that you find our program to offer unsurpassed quality and great value in furthering your aspiration in the exciting world of non-invasive aesthetic treatments.

"I've done 2 certifications through TLI and plan to do a few more. These are excellent courses! They keep them small and personable so you get more hands-on experience and are able to leave the class comfortable and confident to start incorporating what you've learned into your practice immediately! The instructors and staff are all very friendly and accommodating. I would highly recommend these classes to anyone!"

- Zena, TLI Alumni

## Message from the President

Robert E. Logue, JD

We are excited to learn of your interest in non-invasive cosmetic procedures and warmly invite you to become a part of an exciting industry that continues to advance in the most exciting of ways. TLI was born from a simple passion - to provide our industry with tremendous value by combining an uncompromised curriculum and highly experienced instructors with practical tuition and excellent affordability.

As I hope you can agree, we believe the largest threat to aesthetic treatments is a public that does not experience optimal results. When providers are well informed, maintaining a strong command for achieving an optimal balance of safety and effectiveness, our profession benefits greatly.

We strive to be your go-to partner when seeking training in minimally invasive cosmetic procedures as well as your partner in raising the standard of care. I am confident that you'll come to discover why over 5,000 leading practitioners began or decided to expand upon their aesthetics careers by taking advantage of our dedicated instructors and wonderful facilities.

We hope that you'll find our college brochure informative. I look forward to being of continue service to you as well as a foundation of support to further advance your professional pursuits.

## Why Choose Us

Ready to jump-start your career?

Innovative and entrepreneurial in spirit, the Texas Laser Institute uses its access to advanced laser technology, its experienced instructors, and its location near one of our nation's top medical centers to attract outstanding faculty and students.

The Texas Laser Institute educates the new generation of aesthetic laser professionals for the 21st century – men and women capable of shaping the practice of light based aesthetic treatments as well as Neurotoxin and facial fillers with vision and clarity.

## Our Mission

Commitment to providing excellence.

1. Encourage freedom of thought, speech, and inquiry in a tolerant, respectful academic setting that values diversity.
2. Provide innovative courses of study that enable students to exercise analytical and imaginative thinking and make well founded ethical decisions.
3. Nurture and support a highly qualified and entrepreneurial faculty that is excellent in teaching, capable of providing a broad range of intellectual and cultural insights, and is responsive to the professional development needs of its students.
4. Maintain a reputation for superior education and that affirms its role as an outstanding provider

# Our Institute

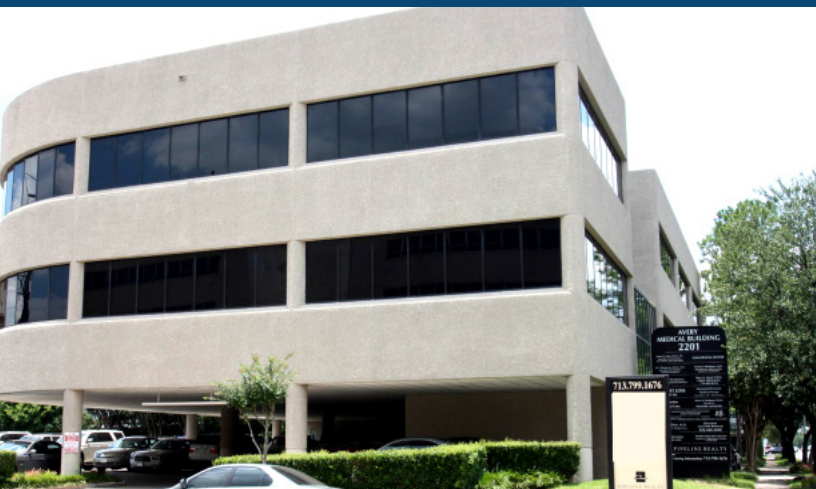

The Texas Laser Institute, founded in 2011, is a result of a steadfast commitment to providing excellence in training and certification for aesthetic professionals.

## Sate Approved Career School & College

The Texas Laser Institute is headquartered in Houston, Texas - just on the periphery of the prestigious Texas Medical Center. With state of the classroom and conference facilities, the Institute also gives students the ability to provide hands-on treatments within a clinical medical spa environment.

The Texas Laser Institute provides an excellent selection of very sophisticated laser technology, and minimally invasive aesthetic devices. Such platforms include Alexandrite and Nd: YAG Laser Systems, IPL machines, body contouring machines for fat destruction, tattoo removal lasers, Skin Pen and microdermabrasion machines, fibroblast technology, as well as Botox and Facial Fillers. In addition, students gain access to solid state and gel form cooling modalities, in the furtherance of epidermal protection for safer treatments and greater patient comfort.

Using an array of treatment modalities, The Texas Laser Institute takes a holistic approach to providing comprehensive instruction and professional development to its students. As approved by the Texas Department of Licensing and Regulation (TDLR), the Texas Laser Institute's 40 hour laser hair removal program allows students to gain state approved training and certification in order to seek licensure as a Certified Laser Hair Removal Technician. Additionally, our state approved curriculum allows practitioners to gain the necessary training as required by the Texas Medical Board in order to provide delegated treatments such as Botox®, Facial Fillers, Body Contouring, Tattoo Removal, IPL Photofacials and certain skin exfoliation courses.

The Institute's headquarters is located within the Medical Center in Houston, TX which affords students with free off-street parking, close proximity and easy access to local restaurants, hotels, and public transportation. With nearly 2,000 square feet of training space, a multitude of fully equipped treatment rooms, and an on-site physician medical director, the Institute is well poised to offer comprehensive training and certification to its students. TLI is also centrally located in Dallas and Austin, TX with flexible training space.

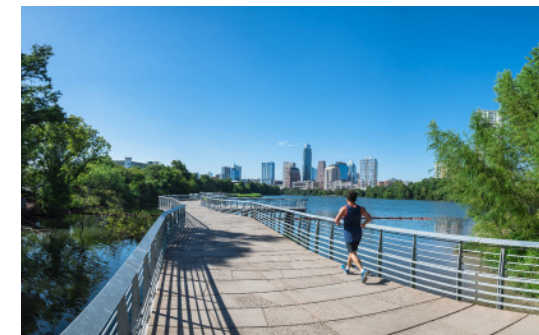

# 1000+ Students Served Across Texas

## Exciting Industry Look

According to the Texas Workforce Commission, job growth in the field of esthetics is projected to nearly double between 2012 and 2022. In 2012, there were 5,130 estheticians licensed in Texas, but by 2022 it is estimated that this number will jump to 7,620 representing a nearly 49% increase.

The Bureau of Labor Statistics (BLS) points out that Texas has the highest employment level of skincare specialists in the U.S. of estheticians licensed in the state. In addition, the Houston metropolitan area has the fifth highest level of employment for this occupation in the nation.

Estheticians who work in Houston, can expect to earn an annual average salary of \$30,680 with an average hourly wage of \$14.72. However, many estheticians and aesthetic laser professionals enjoy additional earnings from gratuity and commission plans, making take-home wages much greater.

## Located throughout Texas

### Houston

A large metropolis in Texas, extending to Galveston Bay. The city's bustling downtown includes Theatre District, Grand Opera and the Historic District, with 19th century architecture, from upscale restaurants to foodie haven.

### Dallas

Modern metropolis in North Texas, is a commercial and cultural hub of the region. This city is the 3rd most populous city in Texas. Experience the Arts District, the largest urban district in the nation or cruise down in Deep Ellum for cool bars & eateries.

### Austin

State Capital of Texas known for its eclectic live-music scene centered around country, blues & rock. Its many parks and lakes are popular for hiking, biking swimming and boating.

## At a Glance

- Thought leaders in aesthetics
- Industry leading instructors
- Innovative course offerings
- State-of-the art training facilities

# Our Team

Our leading faculty is comprised of a diverse group of professionals with extensive experience in all aspects of the medical spa industry. We leverage our expertise to bring you the most advanced training available today.

Robert E. Logue, JD, LSO

President & Dean

Mr. Logue maintains over a decade of experience in the safe and effective operation of laser technology in non-ablative laser procedures, with an emphasis in laser hair removal. Considered an expert by esteemed colleagues and physicians, Mr. Logue has overseen the continued development of extensive course materials for the Texas Laser Institute.

Mr. Logue is a licensed attorney in the state of Texas, and enjoys participating in the continued regulatory evolution of aesthetic treatments.

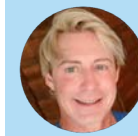

Beth Dugat

Dean of Admissions

Beth is the voice of the Texas Laser Institute, providing our students with a wealth of knowledge while providing learned guidance throughout the enrollment process. As a former graduate of the Texas Laser Institute, Beth is well versed in the theory, practice and science of non-invasive aesthetic treatments, and is the go-to resource for assisting students in the selection of the most suitable training to meet professional growth and career objectives.

# Our Instructors

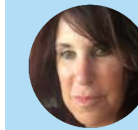

You'll find the high-quality scholarship being produced by our faculty. We believe the research our faculty pursue broadens their own expertise in their field while also increasing the influence they have on students.

Kieth Baxley

Lead Aesthetic Laser Instructor

With over 16 years of experience, Keith Baxley serves as a Lead Aesthetic Laser Instructor for TLI and is registered with the State of Texas as an Aesthetic Laser Instructor and a Professional LHR Technician. He has a passion for training and has been key in the implementation of laser training programs in Texas since 2009. Kieth has also worked closely with Rhonda Allison - an infamous skincare line, during the company's development and helped implement training courses.

Debi Mezistrano-Boer

LE, MA, Laser Specialist

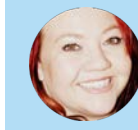

With 11 years as a Licensed Medical Aesthetician and LHR specialist, Debi has mastered her aesthetics skills. This includes facials, microdermabrasion, chemical peels, injections of Botox®, Dysport, Juvederm fillers, and all aspects of laser and light based procedures. Her 18 years in the medical field has brought her to become a Respiratory Therapist as well as a Hyperbaric Medicine Tech. Debi is constantly educating herself and staying current in the medical industry. She is a devoted instructor and shares skills and knowledge with our TLI students.

Cesar Castano

Physician's Delegate, MA, Instructor

Cesar is an aesthetics lover and skin care specialist with over 10 years of experience as a Licensed Aesthetician. His certification and registration with the State of Texas includes Professional Laser Hair Removal Technician, Laser Safety Officer and Physician's Delegation. As a bi-lingual instructor, Cesar specializes in educating our TLI students in both English and Spanish. These courses include the 40-hr LHR, Microdermabrasion & Microneedling, as well as Body Contouring & Skin Tightening.

Amy Endsley

Licensed Texas Esthetician

Amy Endsley is registered with the State of Texas as an Aesthetic Instructor, a Professional Laser Hair Removal Technician and a Laser Safety Officer. As such, she serves as Lead Aesthetic Injection and Aesthetic Laser Instructor for Texas Laser Institute. Amy is also proud to be dually licensed by the State of Texas as a Nurse since 2002 and as an Aesthetician since 2011. She found her true passion by developing several of the curriculum for Texas Laser Institute and sharing her knowledge and expertise of this industry with each of her students.

Onna Fruchter, BSN BBA

Lead Aesthetic Instructor

Born in Sonora, Mexico, Onna is 100% bilingual. She has earned a Bachelor's degree in Business Administration and became a registered nurse working side-by-side with 2 of the most successful plastic surgeons in El Paso. She is currently enrolled at UT Arlington, working towards her Master's as a nurse practitioner. In addition to being an injectables specialist, she is a skincare specialist and certified in lasers and procedures like Ultherapy®, Fraxel®, photofacials, and microneedling.

Amy Nguyen

Master Aesthetic Instructor

Earning an Associates Degree in Architecture from Vietnam University and extensive training through Grand Masters, Amy has over 18 years in the esthetics industry. She is current in her professional license and certifications with the State Texas as an Operator Instructor in Cosmetology, Massage Therapist, Hair Removal Professional, Master Permanent Makeup, Master Instructor Microblading and Eyelash Extension. She is also a successful business owner operating a microblading and lash extension studio located in Houston, TX. Amy strives to always learn the best, current techniques to share with our TLI students.

Dianna Zermeno-Juarez

Lead Microneedling & Microdermabrasion Instructor

Growing up, Dianna battled a skin condition with acneic skin. However, she was always wanted to learn about the treatment and managing this skin condition. After 15 years in the advanced eye care industry, she then decided to further her career by becoming a Professional Licensed Esthetician and earning her certificates as a Professional LHR Technician, Tattoo Removal, Photofacials, Microneedling & Microdermabrasion and Semi-Permanent Makeup. Today, Dianna is passionate about educating her clients in treating their own skin conditions. She believes that consistency with proper skin care and healthy lifestyle leads to beautiful skin.

# Student Testimonials

## Training programs making significant impacts to our graduate students

Our courses are comprised of a group of three to fifteen students per class. A reduced student-teacher ratio concept that promotes a setting where collaboration and cooperation are valued and produce better results, teaching students valuable life-long skills that are important in the professional workplace. It is the instructors' approach providing focused attention, individual feedback - key levers for supporting students.

Here, you'll find the high-quality scholarship being produced by our faculty. We believe the research our faculty pursue broadens their own expertise in their field while also increasing the influence they have on students.

**Fact:** The Texas Laser Institute is the most affordable course programs in the State of Texas. We provide quality training, state-of-art technology access and facility and ranks #1 institute without the costly tuition expenses. We make sure that your tuition is a return investment towards your future.

**Fact:** Students asked and we listened! We offer courses in English as well as Spanish courses. We offer Spanish courses in Laser Hair Removal, Microneedling & Microdermabrasion, Body Contour & Skin Tightening.

# What our students say about our Institute

Our students have built their specific expertise through our training programs to prepare their area of specialization. Eligible students who have completed their studies at Texas Laser Institute have set themselves apart from other candidates in the employment market. We pride ourselves in providing students a high level of education not with just theories and trends. We encourage to broaden awareness, ideas and try new methods so that having a solid knowledge foundation base allows graduates to stay agile in the ever changing landscape of aesthetics industry.

Chelsea L.

"If it wasn't for taking Texas Laser Institute's Laser Hair Removal courses eight years ago - I wouldn't have built & sold three very successful businesses. I doubt they even know how life changing it was for my daughter and!!"

Patricia W.

"I am an esthetics instructor and I highly recommend this school. Informative, efficient, professional, and well worth the price. There are other laser schools that charge twice as much, but don't fall for the hype. This is the best and doesn't over charge you for things you don't need."

Morgan B.

"WOW! This is an AMAZING course with an AMAZING instructor!! I definitely recommend this course to anyone looking to get into this profession! It is a short but super informative course that goes above and beyond to be sure you know your stuff!! The facility is super nice and clean!!"

Patti W.

"What a great long weekend! I just completed the LHR course and feel it was so educational and fun. Our instructor covered EVERYTHING thoroughly and professionally. Plus, such a great sense of humor and a lot of patience for all the questions. I'm so glad I was able to take the course and that I chose TLI for my education."

Maegan E.

"I earned my 100 Treatment Practicum! The instructors were absolutely amazing and made my experience professional and fun! I would recommend any future laser technician at Texas Laser Institute. Thanks again! I cannot wait to come back and complete my training!"

# TAKE YOUR TRAINING FURTHER

## A number of ways to continue your training at TLI

We offer a wide range of course options that can be tailored to your interests and a pathway to your future. Our comprehensive course programs provide you with the tools and access to state-of-the-art technology through classroom and hands-on practice at our facilities.

## LASER CERTIFICATION COURSES

Learn the latest advances in laser technology and training applying theory, science, conduct client consultations and hands-on practice to achieve safe and effective treatments, properly respond to treatment complications as well as practice setting considerations. Add these courses to enhance your Laser Hair Removal Technician License.

- + Body Contouring & Skin Tightening
- + IPL Photofacial & Skin Rejuvenation
- + Laser Safety Officer
- + Tattoo Removal

## MEDICAL LEVEL AESTHETICIAN ACADEMY

Clinical or paramedical aestheticians are skincare specialists with more of a clinical focus to treat and maintain facial skin that has been damaged. Medical aestheticians are responsible for helping patients cleanse, moisturize skin, reverse aging. Add these courses to enhance your Aesthetician or Cosmetology License.

- + Dermaplaning & Chemical Peel
- + Fibroblast Plasma Lift
- + Microneedling & Microdermabrasion

## PERMANENT MAKEUP ACADEMY

The hottest and most in demand beauty service ideal for Professional Estheticians, Permanent Makeup Artists, Cosmetologists and Beauticians. Rewards for a successful career in Microblading are outstanding depending on location and experience of the technician.

- + BB Glow
- + Microblading
- + Semi-Permanent Eyebrow Shading & Ombre
- + Semi-Permanent Makeup Classic Eyeliner & Full Lips

## INJECTABLE ACADEMY

Botox and Facial Filler Specialist is the most popular non-surgical cosmetic treatment. Thousands of medical professionals have successfully capitalized and integrated these easy-to-perform, safe non-surgical aesthetic procedures within their practice.

- + Botox® & Facial Fillers
- + Advanced Botox® & Facial Fillers

# The 4 Levels of LHR Licensure

The State of Texas is unique, in that it is one of just a few states that offers very specific rules and regulations providing clear guidance to the licensure and regulations of laser hair removal practitioners.

From the perspective of a new industry professional, you first want to understand that there are 4 levels of licensure in the State of Texas:

## LEVEL 1: Certified Laser Hair Removal Technician: Apprentice-in-Training

Able to perform treatments, but only when directly supervised.

## LEVEL 2: Certified Laser Hair Removal Technician

Able to perform treatments without direct supervision.

## LEVEL 3: Certified Senior Laser Hair Removal Technician

Able to supervise and apprentice-in-training.

## LEVEL 4: Professional Laser Hair Removal Technician

Able to register a facility. A Professional or Physician must be on-site at all times when laser hair removal is being performed (a Senior may fill in for up to 44 days in the event the Professional resigns from the facility).

Laser Hair Removal is regulated in Texas by the Department of Licensing and Regulation. Click on the following link for state supplied forms, rules and regulations.

<https://www.tdlr.texas.gov/las/las.htm>

*NOTE: As you may already suspect, laser hair removal is regulated at the state level, so be careful, as if you are practicing in a state other than Texas, these rules will not apply to you. You want to inquire with your state regulatory authority (i.e., medical board, cosmetology board, health department) as to the rules and regulations specific to where you are located.*

# Laser Hair Removal Core Curriculum

In Texas, a practitioner is not able to skip steps! As an example, in order to become a Professional Technician, you must first be a Senior Technician. And as you may have guessed, to be a Senior, you must first be a Technician. To be a Technician, you must first become an apprentice. So, where to begin?

## STEP 1

### 40-Hour Laser Hair Removal Apprentice-in-Training

The 1st step is to take the Texas required 40-Hour Laser Hair Removal course from a Texas approved educational provider - such as the Texas Laser Institute. This course is the fundamental class of instruction to learn the necessary considerations for providing safe and effective laser hair removal procedures.

## STEP 2

### 100 Treatment Practicum

After the completion of your 40-Hour class, the progression to becoming a Technician and then a Senior Technician is simply completed by performing or supervising 100 Treatments, respectively. You must submit an application to TDLR following the completion of each level's requirements and receive your updated license prior to beginning the steps necessary to advancing to the next level registration.

The highest level of certification is earned by completion of a Professional Examination from a State approved certifying entity, such as TLI, and submitting the necessary application with TDLR. After receiving your license from the State as Laser Hair Removal Technician, you have the opportunity to reach higher levels. Here are 2 more levels as a technician you can reach, if you desire to:

## STEP 3

### Senior Laser Technician

In this level, it is required that you observe 100 Treatments be performed by an apprentice. At completion, student will receive 4 log sheet with a state application to mail to the state to obtain the Senior Technician License. Once you have received your Senior License you will need to take your Professional Laser Technician test.

## STEP 4

### Professional Laser Technician

This is the final, highest level. In this level, it is required to take a written exam. Once you have completed the exam and reached a passing grade, you will receive a Professional Laser Technician certificate. To obtain your Professional Laser Technician License from the state you must mail a copy of your certificate along with the application and state processing fees.

# 40-HOUR LASER HAIR REMOVAL APPRENTICE-IN-TRAINING

Laser Hair removal technicians remove body hair safely and permanently using state-of-the-art laser equipment. Laser hair removal (LHR) can be safely performed on almost all parts of the body, and is used most often to remove hair on the legs, back, face, armpits and bikini area. Our 40-Hour Laser Hair Removal certification program course is an “apprentice-in-training” that provides hands-on study focusing on the mechanics of lasers as well as the physiology and technique necessary to excel as a laser hair removal professional.

This 4 day, 40-hour course includes certification as a Laser Safety Officer (LSO), all course materials, certificates as well as CPR certification through the American Heart Association.

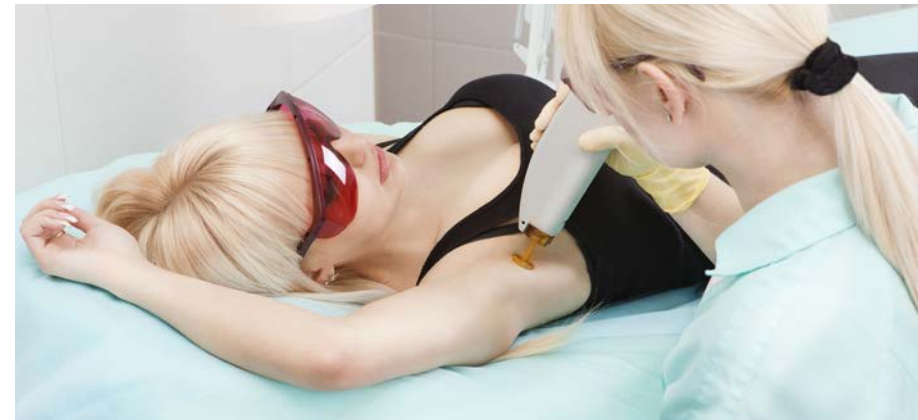

Acclaimed by hundreds of students as the most “exceptional laser instructional educational courses they’ve ever experienced.”

 **995** tuition

#### TUITION FEE INCLUDES:

- Comprehensive Materials
- Model Intake Sheets
- Model Consent Sheets
- Laser Safety Officer Training
- CPR Certification
- Certificate of Completion

## EQUIPMENT ACCESS

Our students enjoy state-of-the-art technology facility access to the most sophisticated machines in the marketplace, including:

- Long pulse Alexandrite Laser Systems
- Long pulse Nd: YAG Laser Systems
- Diode Laser Systems
- Epidermal Cooling Systems

## COURSE OBJECTIVES

**01**

Apply Theory, Science, Practice.  
Interaction of light within competing chromophores.

**02**

Conduct client consultations.  
Settings and protocols.

**03**

Address Treatment Complications.  
Perform CPR.  
Fulfill the responsibilities as a Laser Safety Officer (LSO).

**04**

Respond to practice setting considerations.  
Regulatory considerations.  
Best business practices and considerations.

#### ADMISSION REQUIREMENTS:

- The minimum age for admissions is at least 18 years of age at the date of application.
- Students must have attained a high school diploma, GED or equivalent.
- Proficiency in English reading & writing.

## Achievement

At the completion of the program, an examination will be administered. A certificate from the Texas Laser Institute, LLC as a Laser Hair Removal - Apprentice in Training will be awarded to each individual with the completion of necessary course hours and a passing score on the examination.

Please note that this is just the 1st course. You must complete 2 courses to become a fully certified, Licensed Laser Hair Removal Technician. To obtain your license, TDLR (State) requires you to do the following:

1. Complete a 40-hour Laser Hair Removal Apprentice-in-Training (Course 1) certification course program.
2. Enroll and complete a 4-hour Laser Hair Removal - 100 Treatment Practicum (Course 2).
3. Send both copies of your certificates to TDLR (State) and 4 log sheets, State Applications, and State Fees of \$120.
4. Receive your license from TDLR (State) as Laser Hair Removal Technician. Takes up to 4 weeks.
5. Enroll in and complete a Senior Laser Hair Removal Technician - Observe 100 Treatments.
6. Send copies of your Senior Laser Hair Removal Technician - 4 log sheets, State Applications, and State Fee of \$100.
7. Receive your license as Senior Laser Hair Removal Technician from TDLR (State). Takes up to 4 weeks.
8. Schedule your Professional Laser Hair Removal exam with TLI. Once you pass this exam, you will receive a certificate of Professional Laser Hair Removal.

## Course Agenda | 4 days

4 day course. Friday - Monday. 8am-5pm.

Please contact our Dean of Admissions for details on full course agenda, scheduling and enrollment.

# 100 TREATMENT PRACTICUM

Laser Hair removal technicians remove body hair safely and permanently using state-of-the-art laser equipment. Laser hair removal (LHR) can be safely performed on almost all parts of the body, and is used most often to remove hair on the legs, back, face, armpits and bikini area.

The Laser Hair Removal - 100 Treatment Practicum course provides hands-on study focusing on the mechanics of lasers as well as the physiology and technique necessary to excel as a laser hair removal professional. Students enjoy the option to conduct their first 100 treatments at TLI's facility.

Normally accomplished in under 6 hours, the 100 Treatment Practicum are performed under the direct supervision of either a Registered Senior or Registered Professional Laser Hair Removal Technician.

By completing the 100 Treatment Practicum at our institute, the student is able to expedite his or her registration status to that of a Registered Certified Laser Hair Removal Technician with TDLR.

 **100%**  
 Acclaimed by hundreds of students as the most "exceptional laser instructional educational courses they've ever experienced."

 **750** tuition

**TUITION FEE INCLUDES:**

- Comprehensive Materials
- Model Intake Sheets
- Model Consent Sheets
- Certificate of Completion

## EQUIPMENT ACCESS

Our students enjoy state-of-the-art technology facility access to the most sophisticated machines in the marketplace, including:

- Long pulse Alexandrite Laser Systems
- Long pulse Nd: YAG Laser Systems
- Diode Laser Systems
- Epidermal Cooling Systems

## COURSE OBJECTIVES

- 01** Students will have gained an accelerated comprehension of the application of light for the safe and effective removal of unwanted hair.
- 02** Practice conducting client consultations.
- 03** Determining treatments depending on client skin type. Addressing pre and post treatment considerations.
- 04** Gain additional insight to practice setting considerations.

**ADMISSION REQUIREMENTS:**

- Completion of state approved and recognized 40 hour laser hair removal training.
- The minimum age for admissions is at least 18 years of age at the date of application.
- Students must have attained a high school diploma, GED or equivalent.
- Proficiency in English reading & writing.

 **Achievement**

At the completion of the program, an examination will be administered. A certificate of completion from the Texas Laser Institute, LLC for the 100 Treatment Practicum course will be awarded to each individual with the completion of necessary course hours and a passing score on the examination.

Please note that this is 2nd course. You must complete 2 courses to become a fully certified, Licensed Laser Hair Removal Technician. To obtain your license, TDLR (State) requires you to do the following:

1. Complete a 40-hour Laser Hair Removal Apprentice-in-Training (Course 1, Level 1) certification course program.
2. Enroll and complete a 4-hour Laser Hair Removal - 100 Treatment Practicum (Course 2, Level 2).

# PROFESSIONAL LASER TECHNICIAN

## WRITTEN EXAM:

There is no time limit in taking the written exam or limits on retaking the test. You must have completed the test and reach a passing grade of at least 70%. You must call us to schedule your class day. Once you are scheduled, we will email you a study guide. Once you have completed and reach a passing grade of at least 70%, TLI will send you a Professional Laser Technician certificate.

## COURSE OBJECTIVES

**01**

Students practicing on models (under supervision) Proper technique in the application of Alexandrite, Nd: YAG, or IPL for the removal of unwanted hair.

**02**

Application of proper epidermal protection. Applied comprehension of treatment charting.

**03**

Recognition of clinical endpoints. Application of immediate post-treatment care.

**04**

Respond to practice setting considerations. Regulatory considerations. Best business practices and considerations.

### ADMISSION REQUIREMENTS:

- Completion of state approved and recognized 40 hour laser hair removal training.
- The minimum age for admissions is at least 18 years of age at the date of application.
- Students must have attained a high school diploma, GED or equivalent.
- Proficiency in English reading & writing.

## Achievement

At the completion of the program, an examination will be administered. A certificate from the Texas Laser Institute, LLC as a Laser Hair Removal - Apprentice in Training will be awarded to each individual with the completion of necessary course hours and a passing score on the examination.

Please note that this is Level 4. You must complete 3 courses to become a fully certified, Licensed Laser Hair Removal Technician. To obtain your license, TDLR (State) requires you to do the following:

1. Complete a 40-hour Laser Hair Removal Apprentice-in-Training (Course 1) certification course program.
2. Enroll and complete a 4-hour Laser Hair Removal - 100 Treatment Practicum (Course 2).
3. Send both copies of your certificates to TDLR (State) and 4 log sheets, State Applications, and State Fees of \$120.
4. Receive your license from TDLR (State) as Laser Hair Removal Technician. Takes up to 4 weeks.
5. Enroll in and complete a Senior Laser Hair Removal Technician - Observe 100 Treatments.
6. Send copies of your Senior Laser Hair Removal Technician - 4 log sheets, State Applications, and State Fee of \$100.
7. Receive your license as Senior Laser Hair Removal Technician from TDLR (State). Takes up to 4 weeks.
8. Schedule your Professional Laser Hair Removal exam with TLI. Once you pass this exam, you will receive a certificate of Professional Laser Hair Removal.

## Course Agenda | EXAM

Please contact our Dean of Admissions to schedule your exam day.

The Laser Hair Removal - Professional Laser Technician is the final, highest level. In this level, it is required to take a written exam. Once you have completed the exam and reached a passing grade, you will receive a Professional Laser Technician certificate. To obtain your Professional Laser Technician License from the state you must mail a copy of your certificate along with the application and state processing fees.

### WHAT'S THE NEXT STEP?

To obtain your Professional Laser Technician License from the state you must mail a copy of your certificate along with the application and state processing fees. Please note that state processing time is approximately between 2-4 weeks.

Acclaimed by hundreds of students as the most "exceptional laser instructional educational courses they've ever experienced."

### TUITION FEE INCLUDES:

- Comprehensive Materials
- Hands on Training
- Certificate of Completion

# BODY CONTOURING & SKIN TIGHTENING SPECIALIST

Body Contouring & Skin Tightening is a non-invasive technology which destroys fat cells as it helps firm and tighten the skin using Radio Frequency (RF) to help remove unwanted fat. This will re-contour the body targeting and disrupting specific pockets of fat cells. The heat from RF energy can get to those cells without harming the skin's surface. The fat dissolves and leaves the body through natural processes. It is not a weight loss solution but a cutting-edge body sculpting, non-invasive technology unlike other devices that freeze the skin or having to go through a surgical procedure.

The 1 day Body Contouring and Skin Tightening Specialist course includes extensive theory and practical hands-on application using the latest technology in non invasive radio frequency, LED, and Ultrasound modalities.

This course also includes a presentation on medical spa operations, with insights on effective methods for building a successful Body Contouring & Skin Tightening practice.

## ADMISSION REQUIREMENTS:

- Minimum age for admissions is at least 18 years of age at the date of application.
- Students must have attained a high school diploma, GED or equivalent. Student may show current enrollment in a program or attainment of licensure or education where a high school diploma served as a prerequisite.
- Proficiency in English reading and writing.
- Students must maintain current licensure as a laser hair removal technician, an aesthetician, nurse or physician.

## COURSE OBJECTIVES

**01**

Apply the theory, science, and practice of body contouring and skin tightening modalities.

**02**

Client qualification and consultation. Pre and post-treatment considerations.

**03**

Mitigating and addressing post-treatment complications. Regulatory environment and blood-borne Pathogens.

**04**

Best practices and considerations.

## Achievement

At the completion of the program, an examination will be administered. A certificate from the Texas Laser Institute, LLC as a **Professional IPL Photofacial & Skin Rejuvenation Specialist** will be awarded to each individual with the completion of necessary course hours and a passing score on the examination.

## Course Agenda | 1 Day

9:00	Theory in Body Contouring & Skin Tightening Procedures Tightening modalities
9:45	Client selection
10:00	Break
10:15	Indication & Contraindications
10:45	Patient preparation & post treatment
11:15	Side effects & complications
11:45	Conclusion
12:00	Lunch
1:00	Demo, hands-on practice on training of Body Contouring & Skin Tightening using FR modalities.
5:00	Program evaluation, certification

# IPL PHOTOFACIAL & SKIN REJUVENATION

## Achievement

At the completion of the program, an examination will be administered. A certificate from the Texas Laser Institute, LLC as a **Professional IPL Photofacial & Skin Rejuvenation Specialist** will be awarded to each individual with the completion of necessary course hours and a passing score on the examination.

## ADMISSION REQUIREMENTS:

- Minimum age for admissions is at least 18 years of age at the date of application.
- Students must have attained a high school diploma, GED or equivalent. Student may show current enrollment in a program or attainment of licensure or education where a high school diploma served as a prerequisite.
- Proficiency in English reading and writing.
- Students must have training with laser hair removal, aesthetics, and/or the physiology of the skin.
- Alternatively, the student may demonstrate experience within non-ablative aesthetics, having received training in a related field, or maintain experience within the medical spa industry.

## COURSE OBJECTIVES

**01** Selective Photothermolysis and its application for IPL Photofacial & Skin Rejuvenation treatments.

**02** Achieving a balance of the thermal relaxation time of target chromophores and the surrounding skin.

**03** Client qualification and consultation. Pre and post-treatment considerations. Mitigating and addressing post-treatment complications.

**04** Regulatory environment and safety. Blood-borne Pathogens. Practice considerations.

## Course Agenda | 1 Day

- 9:00 Introduction to IPL Photofacials  
Theory of Intense Pulsed Light
- 9:15 Theory of Intense Pulsed Light
- 9:30 Client selection  
Target Chromophores
- 9:45 Thermal Relaxation Time
- 10:10 Break
- 10:15 Side effects & complications
- 12:00 Lunch
- 1:00 Demo, hands-on practice
- 5:00 Program evaluation, certificate

IPL stands for Intense Pulsed Light technology, also known as Photorejuvenation. It is an FDA & TGA-approved and patented form of treatment. IPL is a safe, versatile and effective procedure treating everything from a wide range of skin conditions and related ailments such as removing wrinkles, blemishes, scarring, reducing pore size, rosacea, spider veins, age spots and overall improving skin texture. As a medical professional or licensed esthetician, you may be allowed to deliver non-ablative laser services like IPL and Skin Rejuvenation. This technology and procedure is a sought after treatment that addresses aesthetic needs of the patients making a significant impact within their practice.

The IPL Photofacial & Skin Rejuvenation Specialist Course offers a comprehensive seminar, with both theory and extensive practical hands-on application. At the completion of the program, an examination will be administered. A certificate from the Texas Laser Institute, LLC as a Professional IPL Photofacial & Skin Rejuvenation Specialist will be awarded to each individual with the completion of necessary course hours and a passing score on the examination.

# PROFESSIONAL TATTOO REMOVAL SPECIALIST

Nearly 35% of people and half of millennials in the U.S. have at least one tattoo and as many as 20% regret getting it and are unhappy with their decision. Lasers remove tattoos by breaking up the pigment colors with a high-intensity light beam. These techniques can get rid of unwanted tattoo with minimal side effects. The number of treatments will depend on age, size, color of tattoo and skin tone pigment. Becoming a Professional Tattoo Removal Specialist is booming and is a niche career in the cosmetic laser technology marketplace. Laser tattoo removal is a series of treatments and clients schedule more than 1 treatment to see results. Students have gone to work in medical spas, laser clinics and tattoo shops.

The Professional Tattoo Removal Specialist course offers a comprehensive seminar, with both theory and extensive practical hands-on application with Q-Switched lasers, latest advances in laser technology, including effective R20 removal method of removing unwanted ink with light to achieve safe and effective treatments using a multitude of light base machines.

## ADMISSION REQUIREMENTS:

- Minimum age for admissions is at least 18 years of age at the date of application.
- Students must have attained a high school diploma, GED or equivalent. Student may show current enrollment in a program or attainment of licensure or education where a high school diploma served as a prerequisite.
- Proficiency in English reading and writing.
- Students must have previous training with tattoos, laser hair removal, aesthetics, and/or the physiology of the skin. Alternatively, the student may demonstrate experience within non-ablative aesthetics, having received training in a related field, or maintain experience within the medical spa industry.

## COURSE OBJECTIVES

**01**

Selective Photothermolysis and its application for the treatment of unwanted ink.

**02**

Achieving a balance of the thermal relaxation time of target chromophores and the surrounding skin.

**03**

Client qualification and consultation. Pre and post-treatment considerations. Mitigating and addressing post-treatment complications.

**04**

Blood-borne Pathogens. Business success.

## Achievement

At the completion of the program, an examination will be administered. A certificate from the Texas Laser Institute, LLC as a **Professional Tattoo Removal Specialist** will be awarded to each individual with the completion of necessary course hours and a passing score on the examination.

## Course Agenda | 1 Day

9:00	Introduction to Tattoo Removal History & Methods
9:15	Laser Physics & Theory of Short Pulse Lasers
10:45	Treatment Parameters: Selective Photothermolysis & Thermal relaxation time
11:30	Break
11:45	Patient intake, consultation, Post-treatment care
12:15	Addressing complications, Blood-borne Pathogens
1:00	Lunch
2:50	Safety demo/hand-on training
5:00	Program evaluation, Certification

# BOTOX® & FACIAL FILLERS [BEGINNER - INTERMEDIATE]

Botox® is an FDA-approved drug made from a neurotoxin by the bacterium, Botulinum toxin. In medical and dental settings, it is used to treat certain medical conditions, such as excess sweating, migraines, muscular disorders. In medical spa settings, it is used cosmetically to treat wrinkles by essentially paralyzing the muscles generally applied to the folds/wrinkles of forehead, cheeks, eye and mouth areas plumping the skin, thus removing wrinkles. With more than 6 million Botox® treatments administered per year, becoming a Botox® and Facial Filler Specialist is the most popular non-surgical cosmetic treatment. Thousands of medical professionals have successfully capitalized and integrated these easy-to-perform, safe non-surgical aesthetic procedures within their practice.

The Botox® and Facial Fillers Specialist, Beginner-Intermediate course offers a comprehensive seminar, with both theory and extensive practical hands-on application. The student will be able to properly diagnose and safely inject Botulinum Toxin-A for the treatment of frown lines, glabellar lines, crow's feet, bunny lines, chine lines & dimpling, and neck bands.

## ADMISSION REQUIREMENTS:

- Minimum age for admissions is at least 18 years of age at the date of application.
- Students must have attained a high school diploma, GED or equivalent. Student may show current enrollment in a program or attainment of licensure or education where a high school diploma served as a prerequisite.
- Proficiency in English reading and writing.
- Students must possess licensure as either a physician, a physician assistant, a nurse practitioner, a registered nurse, or a licensed vocational nurse. A prospective student that does not maintain licensure to practice medicine may also enroll in the seminar if s/he satisfies the first three requirements and works underneath the direct supervision of a physician.

## COURSE OBJECTIVES

- 01** Properly diagnose frown lines, glabellar lines, crows feet, bunny lines, chine lines and dimpling, neck bands.
- 02** Neutralizing Antibodies and Immunogenicity. Dilution. Anatomy.
- 03** Mechanism of Action and Efficacy. Aesthetic evaluation and consultation. Injection techniques and protocol.
- 04** Best practices and considerations. Risks and complications.

## Achievement

At the completion of the program, an examination will be administered. A certificate from the Texas Laser Institute, LLC as a **Professional Botox® & Facial Fillers Specialist** will be awarded to each individual with the completion of necessary course hours and a passing score on the examination.

## Course Agenda | 1 Day

9:00	Introduction to Botulinum
9:15	Botox®: statistics & history of use
9:30	Review of facial muscle anatomy
9:45	Patient selection
9:50	Indications & contraindications
10:00	Break
10:15	Injection techniques
10:45	Patient consultation, prep & after treatments
11:15	Side effects & addressing complications
12:00	Lunch provided with topic discussion: "Practice Success: Building Your Injectable Business"
1:00	Demo/hands-on training
4:45	Q&A session & conclusion
5:00	Program evaluation & certificate

# DERMAPLANING & CHEMICAL EXFOLIATION

Dermaplaning is a medical procedure that exfoliates the skin (or epidermis) by removing dead skin and vellus hair (peach fuzz). The procedure is performed by an aesthetician, who will gently glide a scalpel across the skin, removing the outermost layer of skin cells and hair from the face.

Dermaplaning helps revitalize the skin's top layers of dead skin that lessens that appearance of fine lines and brown spots. The procedure is most often used on clients with rough skin, dry skin, superficial hyperpigmentation, mild acne scarring or fine lines and wrinkles, thus resulting in a more refined, smooth, "glowing" appearance.

Dermaplaning and Chemical Exfoliation Specialist certification offers a comprehensive seminar, with both theory and extensive practical hands-on application. At the completion of the program, an examination will be administered.

## ADMISSION REQUIREMENTS:

- Minimum age for admissions is at least 18 years of age at the date of application.
- Students must have attained a high school diploma, GED or equivalent. Student may show current enrollment in a program or attainment of licensure or education where a high school diploma served as a prerequisite.
- Proficiency in English reading and writing.
- Individuals must possess licensure as either a physician, a physician assistant, a nurse practitioner, a registered nurse, or a licensed vocational nurse. A prospective student that does not maintain licensure to practice medicine may also enroll in the seminar if s/he satisfies the first three requirements and works underneath the direct supervision of a physician.

## COURSE OBJECTIVES

**01**

Extensive Theory & practical hands-on application.  
Anatomy of the Skin.  
Color Theory .

**02**

Client qualification and consultation.  
Eye shape, Lip design pencil drawing & shading.  
Safety, sterilization & sanitation.

**03**

Safety and pre-client qualification and consultation.  
Pre and post-treatment considerations.  
Mitigating and addressing post-treatment complications.

**04**

Regulatory environment and safety.  
Blood-borne pathogens.  
Best practices considerations.

## Achievement

At the completion of the program, an examination will be administered. A certificate from the Texas Laser Institute, LLC as a **Professional Dermaplaning & Chemical Exfoliation Specialist** will be awarded to each individual with the completion of necessary course hours and a passing score on the examination.

## Course Agenda | 1 Day

# FIBROBLAST PLASMA LIFT

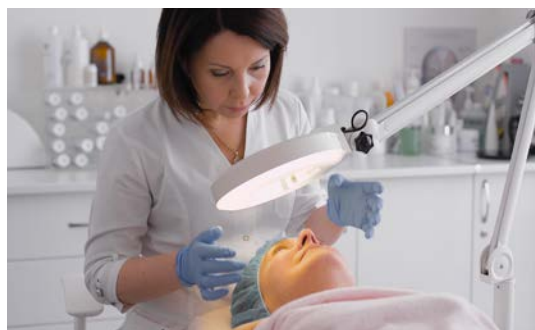

Fibroblast is a relatively new innovation in the aesthetic industry in North America, but for years has been used in Europe and UK. Plasma Lifting/Fibroblast treatments are non-invasive, non-surgical procedures that shrink excess skin and wrinkles while instantly smoothing areas with very little downtime. With a plasma pen device, it is designed to help dramatically repair and reverse all these effects to produce a youthful appearance.

A Fibroblast Plasma Lift treatment is an ideal addition for Licensed Professional Estheticians, Cosmetologists and Beauticians looking to add this service in their practice. Results may not be as dramatic as a surgical procedure, however with the correct proper training techniques and procedures, results are still a highly effective method.

The Professional Fibroblast Plasma Lift Specialist course offers 2 days of comprehensive seminar, with both theory and extensive practical hands-on application. It is designed for individuals intending to add to their aesthetic skillset as well as increase their knowledge in providing students with techniques and intensities of Plasma Lift, Anatomy of the Skin, Fitzpatrick skin types.

 **100%**

Acclaimed by hundreds of students as the most "exceptional laser instructional educational courses they've ever experienced."

 **1995** tuition

#### TUITION FEE INCLUDES:

- Comprehensive Materials
- Fibroblast practice pen device
- Model Consent Sheets
- Testing
- Certificate of Completion

### ADMISSION REQUIREMENTS:

- Minimum age for admissions is at least 18 years of age at the date of application.
- Students must have attained a high school diploma, GED or equivalent. Student may show current enrollment in a program or attainment of licensure or education where a high school diploma served as a prerequisite.
- Proficiency in English reading and writing.

### COURSE OBJECTIVES

**01** History, Theory, Knowledge.  
Anatomy of the Skin, Fitzpatrick Skin Types.  
How Plasma Lift work.

**02** Technique and Intensities Contraindications.  
Common mistakes.  
Benefits and uses of Fibroblast Plasma Lift treatments.

**03** Safety and pre-client qualification and consultation.  
Pre and post-treatment considerations.

**04** Regulatory environment and safety.  
Best practices considerations.

### Achievement

At the completion of the program, an examination will be administered. A certificate from the Texas Laser Institute, LLC as a **Professional Fibroblast Plasma Lift Specialist** will be awarded to each individual with the completion of necessary course hours and a passing score on the examination.

# MICRONEEDLING & MICRODERMABRASION

Microneedling & Microdermabrasion is a minimally invasive cosmetic procedure that's used to treat skin concern via collagen production also known as collagen induction therapy. This helps those looking to reduce the appearance of acne scars, stretch marks, certain anti-aging procedures. The idea is that pin-pricks from the procedure cause slight injury to the skin and that skin responds by making new collagen-rich tissue. This new skin tissue, in turn are more even in tone and texture, and make skin firmer too. Microneedling & Microdermabrasion is one of the most in-demand beauty service for skin resurfacing procedures for tackling wrinkles, hyperpigmentation and other signs of aging. Microneedling produces ablative skin resurfacing like results, but without the use of aggressive lasers.

The Professional Microneedling & Microdermabrasion Specialist course offers a comprehensive seminar, with both theory and extensive practical hands-on application. TLI developed protocols that will be introduced with special attention placed upon a combined treatment consisting of microneedling coupled with a Diamond-tipped microdermabrasion treatment. This course is a medical level aesthetician course. Only licensed aestheticians or cosmetologists may perform these procedures on clients.

## ADMISSION REQUIREMENTS:

- Minimum age for admissions is at least 18 years of age at the date of application.
- Students must have attained a high school diploma, GED or equivalent. Student may show current enrollment in a program or attainment of licensure or education where a high school diploma served as a prerequisite.
- Proficiency in English reading and writing.
- Individuals must possess licensure as either a physician, a physician assistant, a nurse practitioner, a registered nurse, or a licensed vocational nurse. A prospective student that does not maintain licensure to practice medicine may also enroll in the seminar if s/he satisfies the first three requirements and works underneath the direct supervision of a physician.

## COURSE OBJECTIVES

**01** Analysis of mechanical mediums using a multitude of devices, compounds and its application for exfoliation treatments.

**02** Client qualification and consultation. Pre and post-treatment considerations.

**03** Mitigating and addressing post-treatment complications.

**04** Regulatory environment and safety. Best practices considerations.

## Achievement

At the completion of the program, an examination will be administered. A certificate from the Texas Laser Institute, LLC as a **Professional Microneedling & Microdermabrasion Specialist** will be awarded to each individual with the completion of necessary course hours and a passing score on the examination.

## Course Agenda | 1 Day

# PROFESSIONAL MICROBLADING SPECIALIST

Microblading is a tattooing technique in which a small handheld tool made of several tiny needles is used to add semi-permanent pigment to the skin. Microblading differs from standard eyebrow tattooing each hair stroke is created by hand using a blade which creates fine slices in the skin, whereas eyebrow tattoos are done with a machine and single needle. Microblading is typically used on eyebrows to create, enhance or reshape their appearance in terms of both shape and color.

The 3 day, Professional Microblading Specialist course teaches manual techniques by applying natural hair like strokes to the brows. Training in color theory, manual application techniques and choosing the correct pigments to match skin undertones. During this course, you will learn design techniques as well as working with live models. The Professional Microblading Specialist course is designed to train and educate the students in the proper application as well as understanding the healing process. This course also includes presentation on medical spa operations, with insights on effective methods for building a successful Microblading practice.

# SEMI-PERMANENT MAKEUP EYEBROW SHADING & OMBRÉ

Eyebrow Shading & Ombre is one of the hottest trend in semi-permanent makeup. The technique gives eyebrows a soft, shaded look giving definition and depth to the brows. Not every skin type is appropriate for Microblading and the results are much lighter that mimic hair-like strokes. Eyebrow Ombre & Shading can be combined with Microblading which results from subtle to bold brows which achieves a realistic look.

The Professional Semi-Permanent Eyebrow Shading & Ombre course is designed to train and educate the students in proper technique application as well as understanding the healing process. This course will show how to perform Magic Shading Brow & Ombre and help define a beautiful look. Learn manual techniques by applying design techniques to the brows of your clients and perfect your training on Color Theory by choosing the correct pigments to match skin undertones. Tuition includes all course materials, tools, products, tattoo machine & full size personal kit, as well as intensive demonstration on live models.

## ADMISSION REQUIREMENTS:

- Minimum age for admissions is at least 18 years of age at the date of application.
- Students must have attained a high school diploma, GED or equivalent. Student may show current enrollment in a program or attainment of licensure or education where a high school diploma served as a prerequisite.
- Proficiency in English reading and writing.

# SEMI-PERMANENT MAKEUP CLASSIC EYELINER & FULL LIPS

The Professional Semi-Permanent Makeup Specialist course offers a comprehensive seminar, with both theory and extensive practical hands-on application. Semi-permanent makeup, also known as micro-pigmentation is a form of temporary cosmetic tattooing which allows you to have long-lasting eyeliner and full lip color.

Semi-permanent eyeliner creates natural looking defined eyes without wearing constant smearing and smudging of traditional pencil eyeliners. Replacing lip's lost border gives a more youthful, fuller pout appearance without injections, leaving a beautiful hue so you don't need lipstick. Based on the skin's aging this technique can last up to three years.

This 3 day Semi-Permanent Makeup Classic Eyeliner & Full Lips course include all course materials, tattoo machine & full size kit, as well as a presentation on medical spa operations, with insights on effective methods for building a successful Semi-Permanent Makeup practice.

## ADMISSION REQUIREMENTS:

- Minimum age for admissions is at least 18 years of age at the date of application.
- Students must have attained a high school diploma, GED or equivalent. Student may show current enrollment in a program or attainment of licensure or education where a high school diploma served as a prerequisite.
- Proficiency in English reading and writing.

## COURSE OBJECTIVES

**01**

Extensive theory & practical hands-on application  
Anatomy of the Skin  
Color theory

**02**

Client qualification & consultation  
Eye shape, lip design, pencil drawing & shading  
Safety, sterilization & sanitation

**03**

Pre client qualification and consultation  
Pre and post-treatment considerations  
Mitigating and addressing post treatment complications

**04**

Regulatory environment and safety  
Blood-borne pathogens  
Best practices considerations

## Achievement

At the completion of the program, an examination will be administered. A certificate from the Texas Laser Institute, LLC as a **Professional Semi-Permanent Makeup Eyeliner & Lips Specialist** will be awarded to each individual with the completion of necessary course hours and a passing score on the examination.

## Course Agenda | 3 Days
